< insert date >

To whom it may concern,

Re: Suppliers Declaration.

The consignment from <FedEx, DHL etc – select appropriate> with consignment number < insert number > is imported under the import permit number < insert number >

This is to certify that the serum samples enclosed were drawn from healthy animals with no known history or clinical signs of infectious or contagious diseases. The samples are packaged as an 'Exempt Animal Specimen' in accordance with IATA Dangerous Goods Regulations 3.6.2. Samples do not exceed 20mL or 20g each.

As per Permit condition 1.1c:

- The samples were collected from < insert species (eg. a canine or canines) >
- These goods and materials are not known to contain, or are not suspected of containing, the following microorganisms or infectious agents, or derivatives of these:
  - Foot-and-mouth disease virus
  - Sheep pox and goat pox viruses,
  - Viroids
  - Any entire microorganisms or infectious agents listed as, or are known to cause, National Priority Plant Pests on the Australian Department of Agriculture, Water and the Environment's website, or that are entire microorganisms and infectious agents that affect members of the Kingdom Plantae and are exotic to Australia
- These goods are not known to contain Lumpy skin disease virus (LSDV)

The samples have no commercial value and the value for customs is only AUD\$1.00.

As per Import Permit condition 1.1d, the name of the product is < insert specimen identification as per specimen tube here, for example: 'Rex' Mangrove, Microchip No. 985 001 065 251 124' >

Regards
